COMPLIANCE STATEMENT – QL-425/435, AJ-800/1300 PIGMENT INKS

To Whom It May Concern,

Product List:

Printer	INK PNs
QL-425/ QL-435	930.25.0001.00, 930.25.0002.00, 930.25.0003.0, 930.25.0004.00
AJ-800/ AJ-1300	930.26.0001.00, 930.26.0002.00, 930.26.0003.00, 930.26.0004.00

This is to confirm that the pigment based inks supplied by AstroNova for use in QL-425/435 and AJ-800/1300 are compliant with RoHS3 (Directive 2011/65/EU, as amended) and meet the requirements of California Proposition 65. The inks do not contain any substances listed on the REACH SVHC Candidate List, Authorization List (Annex XIV), or Restriction List (Annex XVII). These inks are also manufactured without the use of PFAS (per- and polyfluoroalkyl substances), bisphenol A (BPA), or phthalates (including DEHP, DBP, BBP, and DIBP).

This determination of compliance was made after a review of applicable regulatory restrictions current at the time of issuance of this statement, examination of ingredients in the ink formulations, and verification that restricted substances are not part of the formulation or manufacturing process.

This statement is based solely on the information provided by our supplier and our knowledge of product formulation. We believe the information provided herein to be accurate and offered in good faith. This statement is subject to revision should additional information become available or if regulatory requirements change.

Please note: This statement reflects compliance with regulatory lists current at the time of issuance, including the latest REACH Candidate List update published on June 25,

2025. AstroNova will continue to perform due diligence with future regulatory updates and will notify customers as necessary of any changes impacting compliance

Sincerely,
AstroNova Team
